My precious daughter

The expert refrig man from Hartford is here investigating. He says we ought to be on the power metre, & can't imagine what that \$36 should be required for- says he will find out. [Niantic?] is queer about electricity I think-

He also will give me a pump opinion before he leaves-

It's as hot as [cotton?] and I am wondering about

you my lamb. Nice here of course, and I think bathing would be in season, but shan't go to the beach-

Artie is expecting a letter from [her?] N.Y. friend- evidently wants to see what prospect she holds out- but won't leave just yet any way- I am glad not to have her go to day or Saluka's amount, as Wm. left at 11- & S. might miss both of them, esp. as I go to N.H. this aft. Wm. gave S. chicken for my lunch- part of a present given him by Mrs. Austen for his lunch-

Words can't tell my missing of you- now how perfect this

summer has been all on account of my dear companion. But Friday will soon be here: also my going home time- It would have been lovely if you could have staid though, but it's ever [lovelie?]- that you are such a precious person to others as well as to me- only not so precious!

With dear love
Mother
